

Legacy at the company running event in Basel

The fourth edition of the Swiss companies running event is already history. All employees of Legacy Pharmaceuticals reached the finishing line.

Number of participants increased

With over 30 running employees we increased the number of participants from last year. Within the women's category our best team is ranked 30th out of 101 teams. The best team of our male runners could terminate the running on rank 33 of 203 teams. Our fastest runner completed the 5.9 km long distance in scarcely 22 minutes. Also our employees that did Nordic walking completed the whole distance.

During the after-race dinner in the Hockey Stadium St. Jakob all employees of Legacy could re-load their energy with a warm dish of pasta and celebrate the success. Again, the opportunity was taken to get into conversations with colleagues from other departments. Now we already look forward to the edition of 2010.

Record participation confirmed

With a new, sensational record number of over 4,100 participants the record participation that was expected was confirmed. Altogether 4,134 running people in five different cities crossed the orange goal arch. Basel registered thereby the largest number of participants, 1,708 participants. 2009 is therefore a very successful year for the Swiss companies running event.

Participant honors

In the total Swiss overview SBB this year can call itself "the sportiest company of the nation". With participants in each one of the running cities, SBB could motivate altogether 577 employees to participate. SBB is followed in the ranking by Novartis with 352 participants and F. Hoffmann-La Roche with 287 employees.
