

LEGACY PHARMACEUTICALS SWITZERLAND

Fill & Finishing Portfolio » Datasheet Steriles

Aseptic filling of sterile pharmaceuticals

We offer you a wide range of possibilities for production and aseptic filling of liquid parenteral dose forms, at multiple filling facilities. We are also equipped for thermal final sterilization. Our parenteral products are efficiently 100% inspected for visible particles (ampoules and vials) and for integrity (ampoules) using automated equipment.

For secondary packaging, we offer a broad spectrum of fully automated packaging equipment, all the way up to customer-specific manual packaging.

Dose Form	Manufacturing Process	Maximum Capacity (annually)
	Ampoule filling (1 mL to 10 mL)	up to 90 million ampoules
	Vial filling (2 mL to 50 mL)	up to 25 million vials
